Curriculum Vitae

Language

English, Cantonese, Putonghua

Professional Experience

I am a professional civil engineer, arbitrator, adjudicator, chartered secretary and chartered governance professional. I have over 29 years of engineering and dispute resolution experiences in Hong Kong. My experiences include planning, design, procurement, construction, project management, contract administration, operation and maintenance of a wide range of infrastructures. Many of these projects are multi-disciplinary, involving integration of civil, electrical and mechanical engineering.

I have worked on various form of contracts. I held senior position of Contract Adviser in Water Supplies Department (WSD) between 2019 and 2022 and headed a team to provide support to the Client and colleagues on dispute resolution and contractual matters such as arbitration, mediation, claims assessment, contract interpretation, administration of NEC contracts, tender vetting and tendering procedures, etc.

I was also a Subject Domain Coordinator for contractual issues in WSD, who was responsible for assessing the training needs of the colleagues and develop the training plan for them so as to ensure their competence in delivery of their duties. As WSD was promoting the use of NEC Contracts and then Secondary Option X22: Early Contractor Involvement (ECI) in NEC4, I organized a series of training courses such NEC4 ECC Project Manager Accreditation, NEC4 TSC Service Manager Accreditation, Supervisor Awareness Training, ECI Sharing – HK perspective, Experience Sharing on NEC – Client’s perspective & ECI, and etc. These courses aimed at equipping WSD colleagues with the necessary knowledge and competent skillsets so that they can do their duties with confidence.

I was posted to Lighting Division of Highways Department in 2023. I led a team to implement the Light Emitting Diode (LED) public lighting replacement programme and circuit improvement works. I also headed General Registry of the Division.

I was transferred to Energy Efficiency Division C of Electrical and Mechanical Services Department in July 2025 to oversee the consultancy agreement, entrustment works and contract administration of District Cooling System pipe laying and associated works at Kwu Tung North New Development Area Phase 1.

Curriculum Vitae

Area of Expertise

Civil Engineering, Construction, Contract Administration, NEC Contracts, Project Management, Arbitration, Adjudication, Mediation, Expert Witness

Volunteer Work

Professional Assessment, Assessor
The Hong Kong Institution of Engineers
Session: 2008 – 2016, 2018
