## Chairman's message

By Ir Philip S F KWONG

I am honoured to continue my chairmanship for the Session 2021/2022.

The VC has been serving retired members of the HKIE since it was formed in 2012. Despite the impact of COVID, we have maintained our monthly talks by hybrid way of physical and virtual modes for our members.

It is encouraging to find that this new arrangement has actually drawn in and reached out to more participants, and we are breaking our previous attendance records.

As our monthly talks cover a wide variety of topics beyond engineering, they serve as an excellent platform to help

Ir Philip S F Kwong, Chairman of the VC for Session 2021/2022

members broaden their exposure and share their life experiences.

On the other hand, we are also preparing to hold our Engineering Exposition again in March 2022 for young members of the HKIE.

We usually hold this event on a yearly basis and it provides an excellent opportunity for the upcoming generation to learn from senior members on how to face life's challenges and what kind of attitude they should adopt to achieve their career goals.

The success of the VC depends on the support of members. We welcome retired engineers of the HKIE to join our activities and encourage them to continue their service to the community.
