

## **Competence-based Professional Assessment (PA) in Electronics Discipline**

### **Review of Results of PA 2021**

1. A number of competence-based PAs was endorsed by the Qualification & Membership Board in the period between September 2020 and January 2021.
2. The major failures of PAs fell into the competence area of “Developing Technical Solutions” (i.e., C3 and C4) and “Applying Engineering Knowledge” (i.e., C1, C2 & C11).
3. As a summary of the comments from Assessors, Electronics (ENS) Discipline candidate(s) failed to demonstrate the in-depth understanding on the design principles and design considerations, especially in the interview.
4. It is suggested that ENS Discipline applicant needs to strengthen his/her competences in applying knowledge in the works and developing technical solutions based on the knowledge acquired.
