

Chairman's message

By Ir Prof Wilson TSANG

I am honoured to take up the VC Chairmanship position for Session 2026/2027.

My thanks go to the Founder, the Past Chairmen and Committee Members for their hard work in shaping the VC.

As the VC has been serving retired members of the HKIE since it was formed in 2012, we remain committed to creating meaningful opportunities for our members to stay connected, informed, and inspired.

We have maintained our continuous regular monthly talks through a hybrid format combining physical and virtual modes. And we are happy to see attendance records of 160 - 300 attendees in the past year.

We aim to cover a wide variety of topics beyond engineering in our monthly talks, to provide an inspiring platform for members to broaden their horizons, share life experiences, and strengthen

Ir Prof Wilson Tsang, Chairman of the VC for Session 2026/2027

community ties. To further broaden our minds, we are also planning more outdoor activities, allowing members to learn, explore, and enjoy quality time together.

In addition, we will place greater emphasis on practical and relevant themes for our seniors, including health knowledge and guidance, so that they can better care for their own wellbeing. We will also arrange legal advice to support our seniors in understanding their rights and making informed decisions.

In addition, we are also nurturing our young engineers by organising an Engineering Exposition Seminar in March each year, and yearly Professional Assessment Workshops in January and May. These regular events provide an excellent opportunity for the upcoming generation to learn from the senior members how to face life's challenges and what kind of attitude they should adopt to achieve their career goals.

The success of the VC depends on the support and participation of our members. We welcome all retired engineers in the HKIE to join our activities, share their experiences, and continue to serve the community.
