Advertisers' Edition

# Delivering a sustainable future for the Northern Metropolis

Combining our multidisciplinary expertise in digital transformation, low-altitude economy, ESG and sustainability, and new energy, we're delivering innovative solutions that shape the new development areas of the Northern Metropolis.

From enhancing biodiversity at Long Valley Nature Park to sustaining aquaculture at Sam Po Shue Wetland Conservation Park — and driving major planning and infrastructure such as San Tin Technopole, the Northern Metropolis Highway, and Hong Kong-Shenzhen Western Rail Link (Hong Kong Section) — we're integrating environmental stewardship with engineering excellence.

## ***Vision***

### **Sustained Excellence in the Engineering Profession**

持續發揮優質工程專業

## ***Mission***

To promote the advancement of engineering and to facilitate the exchange of knowledge and ideas.

帶領工程界邁步向前，促進知識與理念的交流。

To provide a broad range of services to members, to assist them in developing their careers and to play their full role in contributing to society.

為會員提供多元化的服務，幫助他們發展事業，服務社會。

To maintain a high standard of the profession, and to raise the standing and visibility of engineers.

維持工程界的專業水平，並提高工程師的地位及聲望。

## ***Core Values***

Sustainability 持續發展

Professionalism 專業精神

Integrity 廉潔正直

Excellence 精益求精

Continuous improvement 力臻完善

## **Objects of the Institution**

The objects of the Institution are, subject to this Ordinance:

- (a) to promote the general advancement of the science and practice of engineering in all its disciplines and branches;
- (b) to maintain the integrity and status of the engineering profession and to represent it both to the public and to the Government;
- (c) to establish and operate technical groups, specialist sections, divisions or colleges within the Institution;
- (d) to encourage and foster a spirit of friendly collaboration amongst its members and with members of similar institutions or other professional bodies;
- (e) to hold meetings of the Institution for receiving communications for discussion on subjects bearing upon engineering or upon subjects relating thereto;
- (f) to facilitate the exchange of information and ideas in relation to various disciplines and branches of engineering and to publish and communicate to members information on all matters in connection with the profession of engineering;
- (g) to promote the acquisition of that species of knowledge which constitutes the profession of engineer including modern management methods;
- (h) to establish scholarships and grant prizes;
- (i) to discourage dishonourable conduct and practices arising in the engineering profession;
- (j) to do all such other things as are incidental or conducive to the attainment of the above objects as the Council may consider appropriate.

## **Powers of the Institution**

Subject to this Ordinance the Council may, on behalf of the Institution, do all such things as are necessary for, or incidental or conducive to the better carrying out of the objects of the Institution, and, in particular, but without prejudice to the generality of the foregoing, may:

- (a) acquire, take on, lease, purchase, hold and enjoy any property and sell, let or otherwise dispose of the same;
- (b) enter into any contract;
- (c) provide appropriate amenities for members;
- (d) employ staff;
- (e) provide residential accommodation for staff and visiting guests;
- (f) provide or contribute to pensions for staff;
- (g) act as trustee in relation to pension schemes and funds for scholarships and prizes;
- (h) borrow money in such manner and on such securities or terms as the Council deems appropriate or expedient;
- (i) apply for any grant in aid for the functions of the Institution on such conditions as the Council deems appropriate or expedient;
- (j) invest the funds of the Institution in such manner and to such extent as the Council thinks appropriate or expedient.

# Foreword

It is with a profound sense of purpose that I present to you the *HKIE Yearbook 2026*.

As I reflect on my Session under the theme “Together we RISE,” I am reminded that engineering is far more than a technical pursuit—it is a promise we make to society. It is a quiet vow to ensure the safety of our citizens, the resilience of our infrastructure, and the sustainability of our shared future. This Yearbook is not merely a directory of names; it is a tapestry of the talent, dedication, and collective conscience that defines the HKIE.

In a world reshaped by rapid technological shifts and climate pressures, our profession must do more than just adapt—it must lead. Throughout this Session, we have focused on moving the Institution from a position of strength to one of inspiration, ensuring that we RISE across four key pillars: Resilience, Innovation, Sustainability, and Equity.

Our commitment to Innovation and Sustainability is best seen in how we nurture the next generation. Through **EngSeeds**, we have sown the foundations for a vibrant talent pipeline, inspiring young minds to see engineering as a calling of immense social impact. Similarly, we have continued to evolve the **Engpreneurs** initiative. By deepening our partnership with Cyberport, we are empowering our members to bridge the gap between technical brilliance and entrepreneurial leadership, ensuring that the “resourcefulness” I often speak of is translated into tangible solutions for our city.

To RISE also requires us to look inward and evolve our own institutional heartbeat. We are currently in the midst of a significant **digital transformation**, overhauling our membership database and digital interface. This is not just a technological upgrade; it is an act of Equity. By creating a more intuitive and inclusive digital home, we ensure that every member, whether a student in Hong Kong or a Fellow practicing overseas, feels connected to the Institution’s core.

However, leadership also demands the resilience to learn from adversity. Through challenging circumstances, our efforts have served as a solemn reminder of our professional responsibility. The recommendations we have put forward are a testament to our accountability—proving that when we serve with integrity, we uphold the public trust that is the very foundation of our title, “Ir”.

As you navigate this Yearbook, I hope you see it as a living record of a profession that builds what endures. Whether you are seeking a collaborator or a mentor, remember that our greatest strength lies in our unity.

I would like to express my heartfelt gratitude to the HKIE Secretariat for their tireless work in managing our digital transition, and to our advertisers for their steadfast support. Most importantly, I thank you, our members.

Let us continue to be the inspiration for those who follow. With resilience in our hearts and innovation in our hands, let us continue to rise together.

A handwritten signature in black ink that reads "Alice Chow". The signature is fluid and cursive.

Alliance Contracting Company (Alliance) was founded in 1979. After 47 years, Alliance has been a reputable full scope building services specialist contractor of Hong Kong, Macau and PRC. Our professional services are delivered by our competent and professional staff members. We had successfully delivered variety scales and complexity Private and / or Public projects in these areas. The scope of these projects including but not limited to New build, A&A, Renovation, fitting-out, term contract, and etc.

Our Core Business covers design, supply, installation, and maintenance of the following:

- MVAC Services
- Electrical Services
- Fire Services
- Plumbing and Drainage Services
- Full set Building Services Package Works
- Energy Saving and Management
- Specialist Services

We commit to quality services delivery to the satisfaction of Client's requirements, as well as build a better City; a green and energy efficient built environment for the Community.

Anlev Elevator Group ("Anlev") – ATAL Engineering Group's global brand of lifts, escalators, and moving walkways, specialises in the design customisation, manufacturing, sales, installation, modernisation, and maintenance of a wide range of vertical and horizontal mobility solutions, serving millions of users and customers across over 20 countries on six continents.

With our own factory facilities in Nanjing, China, Anlev offers a complete range of high-quality, safe and energy-efficient products suitable for all market sectors. Our professional teams provide tailor-made solutions using energy-efficient and environmentally friendly products to meet client needs across passenger, freight and heavy-duty models in commercial, residential, industrial and infrastructure environments, all fully compliant with international standards.

Anlev has completed acquisitions and successfully established lift businesses in the United States and the United Kingdom. These acquisitions enable Anlev to provide comprehensive one-stop lift and escalator services for customers, while also strengthening our position in Europe and North America advancing our global expansion plan.

Asia Infrastructure Solutions (AIS) is a leader in delivering sustainable design, engineering, project & programme management, cost management, business advisory and consultancy solutions for the infrastructure, buildings and environmental markets. AIS was established by Global Infrastructure Solutions Inc. (GISI) and its founding members through the rebranding of their professional expertise and technical capabilities, with over 90 years of project experience in Asia.

AIS has inherited from the legacy companies of Arcadis Design & Engineering, Hyder Consulting, Acer Consultants (Far East), Freeman Fox & Partners (Far East) Asia. Our story first began in 1965 when the Hong Kong Government commissioned the firm (Legacy Freeman Fox & Partners) to examine ways of relieving increasingly chronic road congestion and to deliver the first transit railway line in Hong Kong.

Our project portfolio covers a wide spectrum, spanning multiple disciplines inclusive of tunnels and bridges, building structures, building services, electrical and mechanical systems, environmental, geotechnics, rail, highways and transport, reclamation, marine and port works, drainage and water engineering. Our recent iconic projects in Hong Kong include the Integrated Waste Management Facilities Phase I, Kai Tak Trunk Road T2 and Cha Kwo Ling Tunnel, Shatin to Central Link Cross Harbour Tunnel and the Smart & Green Transit System, East Kowloon. We believe that inspiring engineering solutions are rooted in technical excellence, a deep understanding of the needs of our clients and the wider community, the ability to respond to these needs, and a genuine commitment to sustainability. AIS is a leading provider of advanced computational tools and innovative techniques for optimizing structural systems in the construction industry. We have a dedicated Innovation and Technology team that specializes in technologies such as Modular Integrated Construction (MiC), Digital Twins, Robotic Process Automation, and Generative AI to enhance the efficiency and effectiveness of delivery throughout the whole project lifecycle, and more importantly to attract and retain talents.

### Our Achievements

The corner stone to the success of Bachy Soletanche Group Limited has been the superior service provided to its clients for more than five decades.

- leading edge design and construction
- award winning equipment and processes
- innovations in ground technology
- over 800 contracts successfully completed
- proven professionalism and excellence

### Our Vision

BSGL's vision is to be the leading foundation and geotechnical contractor in Asia and the specialist partner of choice for owners, developers, designers and general contractors to:

- provide practical and innovative solutions to ground engineering and geotechnical problems
- design and construct quality works to satisfy all needs and requirements

### Strategies

BSGL will pursue its vision by:

- technical creativity – designing of efficient and reliable geotechnical solutions and alternatives; undertaking proactive research and development closely linked to client needs and operational requests.
- powerful logistics – rapid mobilisation of human and equipment resources of quality, quantity and diversity through being resource-rich.
- business professionalism – imaginative and flexible approach to contractual arrangements; active participation in risk management and value engineering; dedication to quality and safety.

### Business Associates

BSGL's sister companies providing further specialisations throughout Asia are:

- CSM Bessac – tunnelling
- Freyssinet – prestressing
- Menard Asia – ground improvement
- Geoquest – retaining works
- Sixense Limited – monitoring services

 Website : binnies.com

Binnies is a leading global engineering and consulting firm providing innovative, whole-life-cycle solutions across the built environment. Since establishing its Hong Kong presence in 1930, Binnies has evolved from a water infrastructure specialist into a multidisciplinary consultancy covering water, environment, civil, geotechnical, structural, building services, urban development, transportation and construction.

For nearly a century, Binnies has shaped the city's landscape through iconic achievements, including High Island and Plover Cove Reservoirs, development of Tin Shui Wai and Yuen Long New Towns, the city's first cavern service reservoir at the University of Hong Kong and pioneering underground flood mitigation schemes at Tai Hang Tung and Happy Valley.

Today, Binnies remains at the forefront of Hong Kong's infrastructure evolution, spearheading "first-of-its-kind" projects such as the Tseung Kwan O Desalination Plant, the Yuen Long Barrage, advanced effluent polishing plants at San Tin and Yuen Long South, and I-PARK2 (Hong Kong's second integrated waste management facility). Binnies' capabilities span city infrastructure development, providing planning and engineering for large-scale public projects, including the San Tin / Lok Ma Chau Development Node, the Northern Metropolis, and the District Cooling System for the Hung Shui Kiu / Ha Tsuen New Development Area.

As part of the RSK Group, a leading international environmental, engineering, and technical services group with a global network of 17,000 professionals in over 40 countries, Binnies leverages international insights to resolve local complexities. With a legacy exceeding 100 years, Binnies continues to engineer sustainable, resilient infrastructure to support Hong Kong's growth and enhance community well-being.

China Railway Group Limited ("CREC" for short), headquartered in Beijing, is a super-large corporate conglomerate engaged in engineering survey, design and construction, industrial equipment manufacturing, real estate development, resources and mining development, financial investment, and other fields. As one of the world's largest construction and engineering contractors, CREC has been listed among Fortune Global 500 for 17 consecutive years. In 2022, it was ranked 34th on the Fortune Global 500 list, and 5th among China's top 500 enterprises.

Approved by the Ministry of Housing and Urban-Rural Development of China, CREC holds the Special-Grade Qualification for General Contracting of Railway Projects, and Grade-A Qualification for General Contracting of Road and Municipal Facilities Projects, as well as Grade-A Qualification for Specialty Contracting of bridges, tunnels, roadbeds, road surfaces and urban rail transit projects. CREC also holds certificates for carrying out foreign economic cooperation and import & export businesses.

CREC holds a leading position in the design and manufacturing of machinery equipment. The company owns the largest number of tunnel boring machines (TBM) track laying machines and bridge erecting machines used in railway construction, and catenary installation equipment for electrified railways in China. It also boasts ship-mounted cranes with powerful lifting capacity and full sets of deep-sea water working equipment. CREC can not only independently develop and manufacture world-class dedicated heavy industry machinery, but is known as one of the three TBM manufacturers with independent intellectual property rights in the world.

### Our Scope of Services

Newland Engineering Limited ("Newland"), established in 1977, is one of the major building services contractors in Hong Kong. We provide complete package of professional services covering design, supply, installation, operation and maintenance for full range of electrical and mechanical (E&M) engineering services. Our expertise covers HVAC (heating, ventilation and air-conditioning), electrical services (low voltage and extra low voltage system), fire services, plumbing and drainage services and building automation system.

### Our Strength

Being registered as an approved HVAC and Electrical contractor in the government, Newland, with the support of a group of experienced professional engineers, has completed many large-scale projects. These include government buildings, commercial and residential developments, hospitals, data center, schools and hotels. Over the years, our incessant strive to improve our management system resulted in obtaining an Integration Management System (IMS) Certificate from the Hong Kong Certification Services International Limited (HKCSI), which comprises the following components:

Quality Management System, ISO 9001:2015, Certificate No. CC310;  
 Environmental Management System, ISO 14001:2015, Certificate No. CC311;  
 Occupational Health and Safety Management System, ISO 45001:2018, Certificate No. CC309;  
 Integrated Management System (ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018), Certificate No. CC308; and  
 Anti-bribery Management Systems (ISO 37001:2025), Certificate No. CC630.

# SIEMENS

Siemens is a technology company focused on industry, infrastructure, mobility, and healthcare. The company's purpose is to create technology to transform the everyday, for everyone. By combining the real and the digital worlds, Siemens empowers customers to accelerate their digital and sustainability transformations, making factories more efficient, cities more livable, and transportation more sustainable.

In 1911, Siemens opened its first sales office in Hong Kong. Since then, the company has committed to being a trusted technology partner and providing innovative solutions in Hong Kong and Macao. Siemens has provided integrated solutions for infrastructure development projects, including electrical substation solutions, high to low voltage equipment to the power utilities, cranes technology for port, total automation solutions for water and wastewater treatment plant, AI optimization for data center. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).

Skyforce Engineering Limited (SEL) is a trusted and reputable building services provider in Hong Kong, specialising in heating, ventilation and air-conditioning (HVAC) engineering. With over 30 years of industry experience, our team delivers integrated solutions to the government, public and private sectors.

#### **Our Expertise**

From new construction to retrofitting, we provide end-to-end services in design, installation, operation, and maintenance. We are highly recognised for our work in various specialised environments, including:

- Critical facilities: Data centres, hospitals, cleanrooms and research laboratories
- Industrial and Food Science: Pharmaceutical labs and food and catering facilities
- Educational, Commercial and Residential: Education complexes, student hostels, hotels, and exhibition buildings

We also provide energy-related services including energy audits, retro-commissioning (RCx), and efficiency upgrades to optimise building performance and promote sustainable development.

#### **Quality and Integrity**

Committed to excellence in management and customer satisfaction, our ISO-standard integrity policies and certified management systems ensure that every project meets the technical demands in Hong Kong.

#### **Nurturing the Next Generation**

SEL values the importance of nurturing young engineers. Through the HKIE Scheme A Training Programme and our structured in-house mentorship, we empower young engineers to develop a strong technical foundation and leadership potential, preparing them to be the future leaders of the industry.

## COMPANY LISTING

**SOCAM Development Limited**  
**13/F, New Kowloon Plaza,**  
**38 Tai Kok Tsui Road,**  
**Tai Kok Tsui, Kowloon**

**瑞安建業**  
**SOCAM DEVELOPMENT**

Tel : (852) 2398 4723  
 Fax : (852) 2622 8520  
 Email : julian.lo@shuion.com.hk  
 Website : www.socam.com

SOCAM was listed on the main board of the Stock Exchange of Hong Kong in February 1997. The newly listed company combined the construction business of the Shui On Group, which was the founding business of Shui On since 1971, as well as Shui On's construction materials operations. SOCAM's early focus was on Hong Kong.

The Group played a prominent part in Hong Kong's construction boom which saw a considerable increase in private and public sector works in the late 1990s. Our construction subsidiaries, Shui On Construction and Shui On Building Contractors, stood out among their competitors in public housing construction and in prominent design and-build contracts. The Group's construction materials division also prospered alongside the construction boom.

By the end of the 1990s, SOCAM had been seeking long term sustainable growth by diversifying our business, hence its early investments in Mainland cement plants, and established Lafarge Shui On Cement to form a new cement leader in the southwest region. SOCAM was also involved in the distressed property market since 2005 with the acquisition of Xiwang Building in Dalian. So far, SOCAM has turned around 22 partially completed projects located in major and secondary cities in Mainland China, many of which have been completed and disposed of.

Lafarge Shui On Cement was disposed in 2016. Today, SOCAM enjoyed a strong position in its construction and property business sectors. Building on our roots in Hong Kong, our construction business continue to play a robust role in the public sector construction and have successfully expanded into maintenance and interior fitting-out works. In Mainland China, SOCAM is taking proactive steps on asset enhancement of our retail properties.

## COMPANY LISTING

**The Hongkong Electric Co., Ltd.**  
**Hongkong Electric Centre,**  
**44 Kennedy Road, Hong Kong**

Tel : (852) 2843 3111  
 Fax : (852) 2810 0506  
 Email : mail@hkelectric.com  
 Website : www.hkelectric.com

The Hongkong Electric Co., Ltd. is an electricity utility established in 1889, specialising in the generation and supply of electricity to Hong Kong and Lamma Islands.

HK Electric's transmission system operates at 275 kV, 132 kV and distribution is effected at 22 kV, 11 kV and 380 V. Except for a few LV overhead lines, the entire transmission and distribution system is underground.

Currently, the Lamma Power Station has an installed capacity of 3,081.5 MW. In 2006, the first gas-fired unit was put into operation, using natural gas for power generation. Today, the power station benefits from four gas-fired units, which generate a total of 1,475 MW. Re-gasified natural gas is being supplied from the Guangdong Dapeng LNG Terminal located in Shenzhen via a 92-km submarine gas pipeline connecting the LNG terminal and Lamma Power Station Extension since 2006. In July 2023, the Floating Storage and Regasification Unit, Bauhinia Spirit, and the Hong Kong Offshore LNG Terminal were successfully commissioned and began commercial operations. Re-gasified natural gas is being supplied from the Hong Kong Offshore LNG Terminal via an 18-km submarine gas pipeline connecting the LNG terminal to the Lamma Power Station Extension, as the second source of supply of natural gas. Gas-fired generation now constitutes approximately 69% of HK Electric's total power output and will continue to increase with a view to phasing out all coal-fired units by 2035.

Since 2010, the Company has installed solar power systems in phases across open areas and building rooftops at Lamma Power Station. As at Q1 of 2026, more than 9,200 solar panels have been deployed in the power station, providing a total generation capacity of 1.47 MW, making it one of Hong Kong's megawatt scale solar power installations and a major source of HK Electric's renewable electricity generation.

As a major utility, HK Electric recognises its responsibility to protect the environment while delivering a stable and reliable electricity supply to the community. The Company sets extremely high standards for environmental protection across air, water, noise and land, and continues to adopt advanced technologies to monitor and minimise its environmental impact.

In parallel, HK Electric consistently delivers world-class supply reliability, which exceeded 99.9999% in 2025, meaning customers experienced, on average, less than half a minute of unplanned power interruption over the year. Through initiatives such as Smart Power Services, HK Electric also encourages the wider community to decarbonise, supporting Hong Kong's long-term goal of achieving carbon neutrality by 2050 while upholding a reliable and resilient power supply.

Superpower Pumping Engineering Co., Ltd. ("Superpower") has engaged in manufacturing, agency, sales, installing, repairing and maintenance of various kinds of water pump and plumbing equipment since 1977. Superpower is proud to become Hong Kong's first company of water pump design and production, as well as the territory's only outlet integrating manufacture of water pumps and provision of after-sales maintenance services for 40 years.

Superpower strives to fulfill its vision and mission of delivering high-quality products and excellent services to its valuable customers. Substantial resources have been invested in every aspect of product design, research and improvement, as well as manpower and business development to meet the ever-growing demands of the customers and ensure the water supply system of the serving properties operate reliably. Nowadays, numerous professional staff are employed to provide superior repair and maintenance service to over 1,000 properties in Hong Kong ranging from deluxe residences to large scale estates, and from innovative office towers to comprehensive shopping malls, hotels and schools.

Superpower has the following key business coverage:

1. Water pump manufacturer: producing various types of water pump under the brand name of "Superpower"
2. Plumbing equipment agency: searching for high quality plumbing equipment around the world for customers
3. Maintenance & engineering service contractor: providing professional water pump system maintenance, installation and repair services

Established in 1862, The Hong Kong and China Gas Company Limited ("Towngas") is the public utility with the longest history in Hong Kong and one of the city's largest energy suppliers, operating at world-class standards of corporate management and operations. For generations, Towngas has provided safe and reliable energy solutions to the public, leading the way in the Greater China energy sector.

In 1994, Towngas expanded its business into the Chinese mainland. The Company now operates over 1,180 projects in 29 provincial regions on the Chinese Mainland and overseas. Our mission drives us to customers with not only safe and reliable energy but also innovative, smart solutions that meet evolving environmental and social needs. In recent years, Towngas has been actively developing clean energy solutions, including hydrogen energy, marine green methanol, and sustainable aviation fuel, supporting Hong Kong's goal of achieving carbon neutrality before 2050 and China's national "30-60" dual carbon goals.
