**Make it happen with**  
**Professionalism . Quality . Safety**

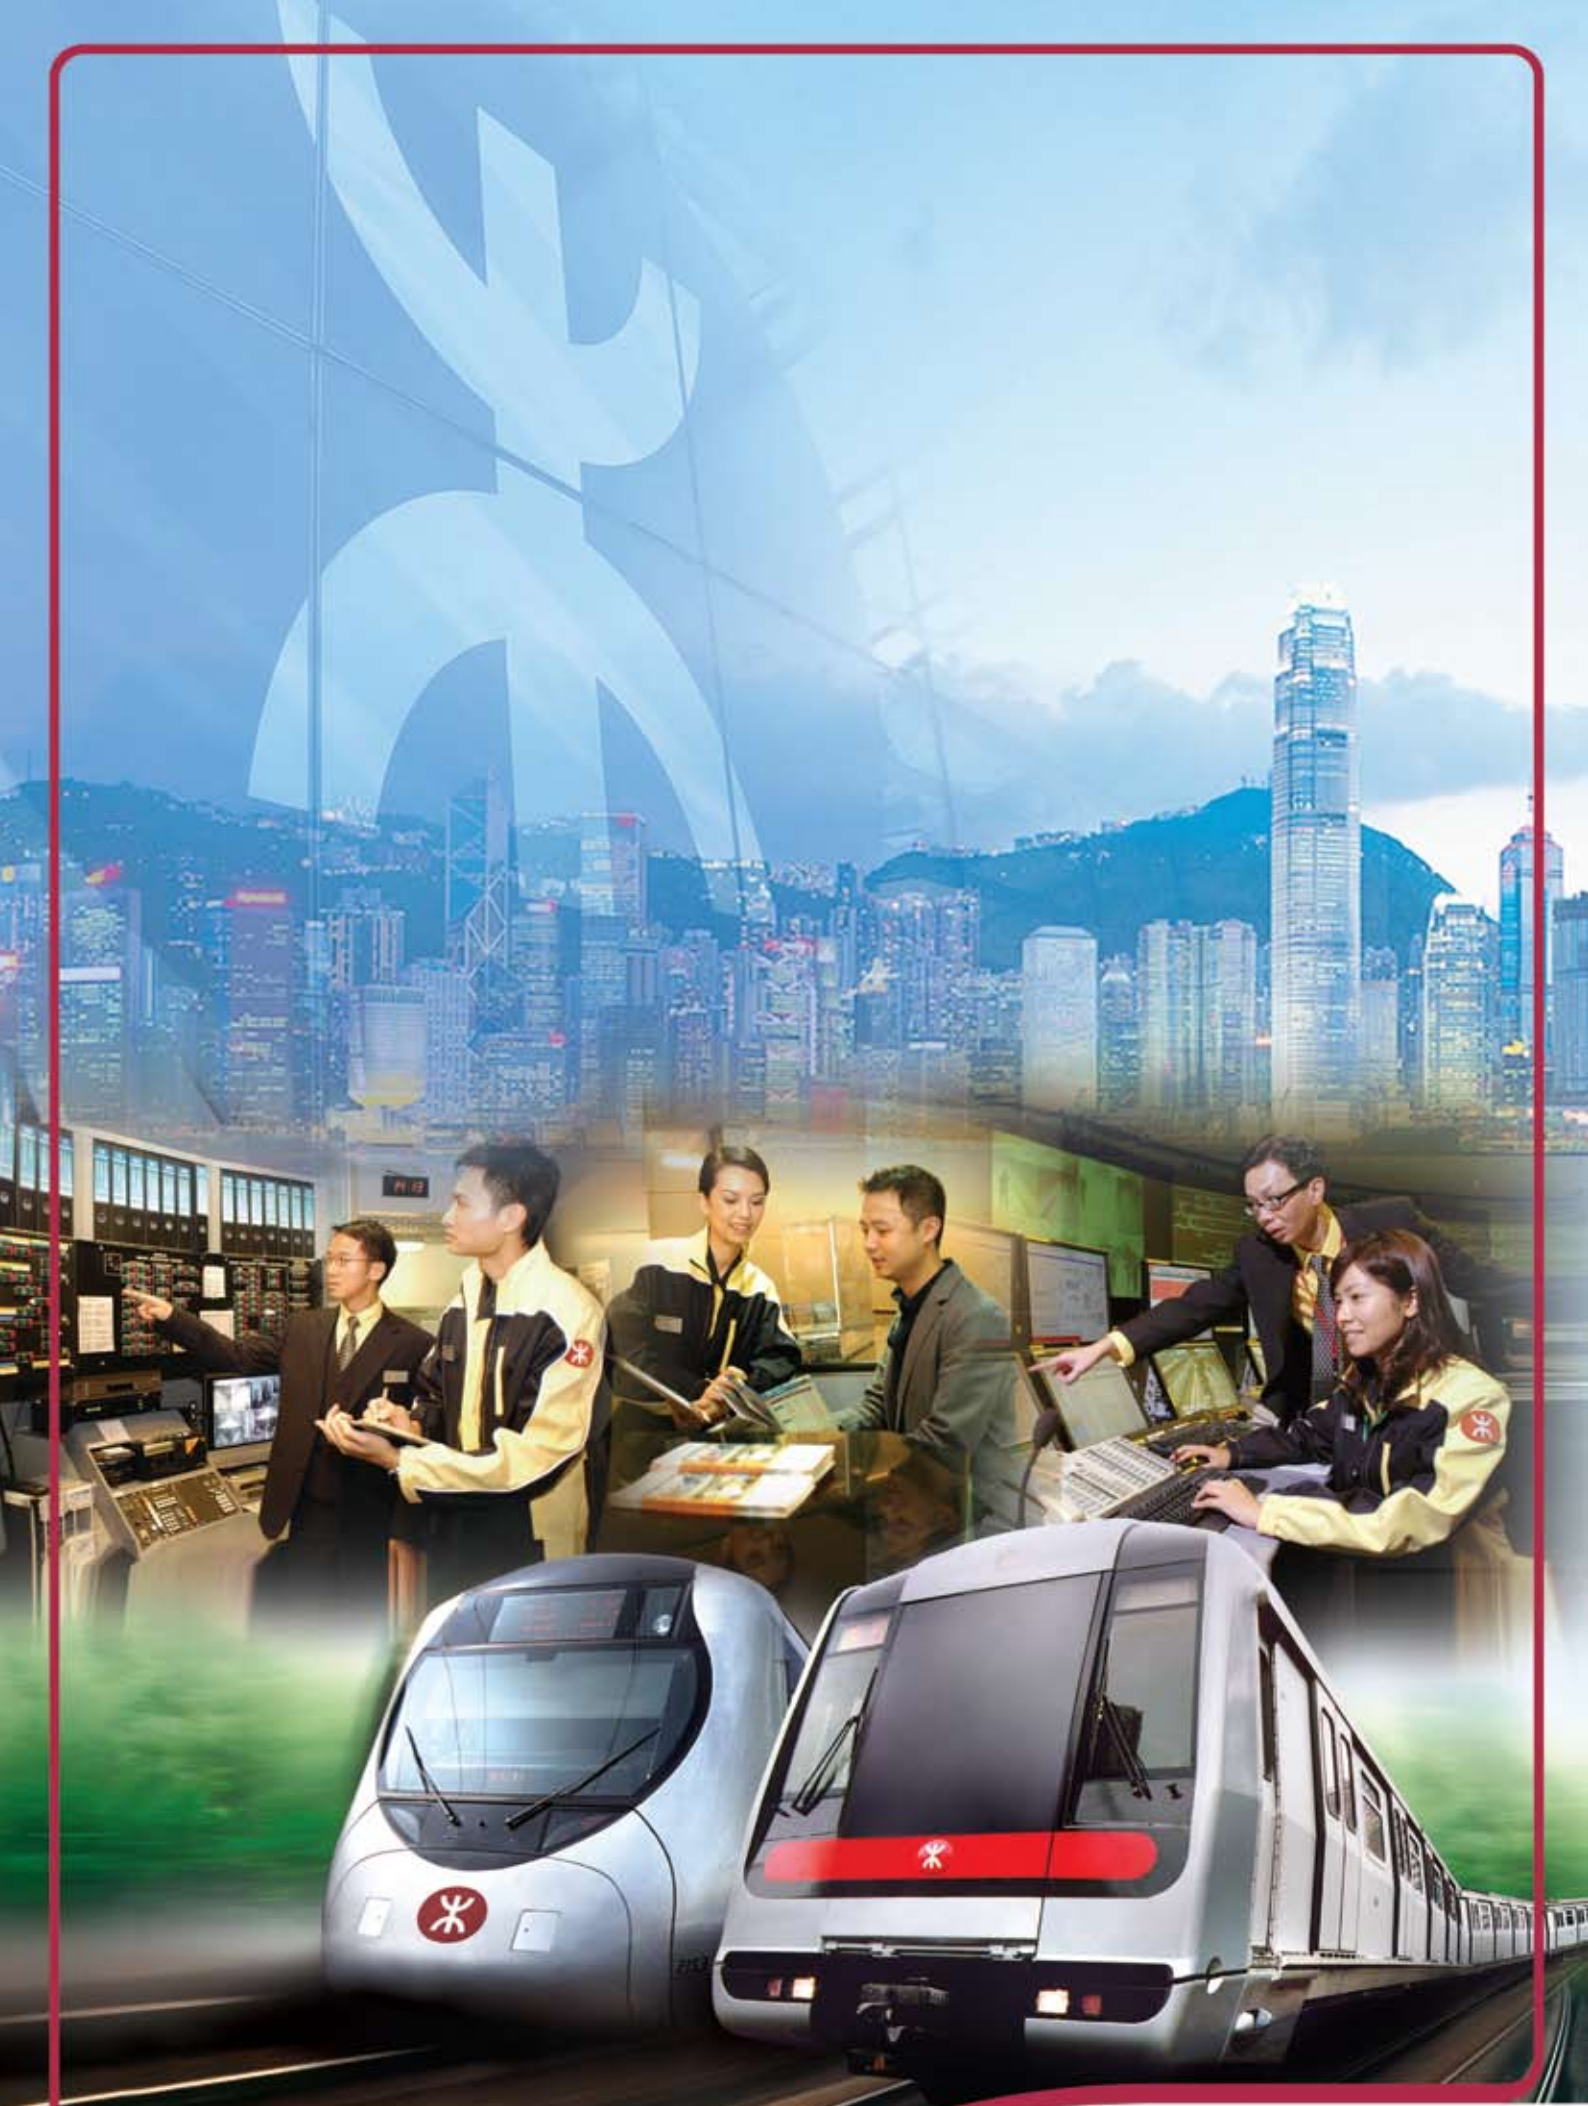

**Kum Shing** (KS) was founded in 1963 as a construction and engineering service provider to maintain electricity supply and enhance utility infrastructure of Hong Kong. Today, KS is a multi-disciplinary business group with a team of over 2000 professional and technical associates.

KS would like to extend its best wishes and heartfelt thanks to the HKIE for organizing the YMC Overseas Delegation 2010 to Denmark. We trust the delegation can acquire new experiences and global exposure to climate change issues, while inspiring young engineers to reflect on engineers' role in such a topic that is all-crucial to the sustainable development of our future. We fully support the delegation and wish it every success.

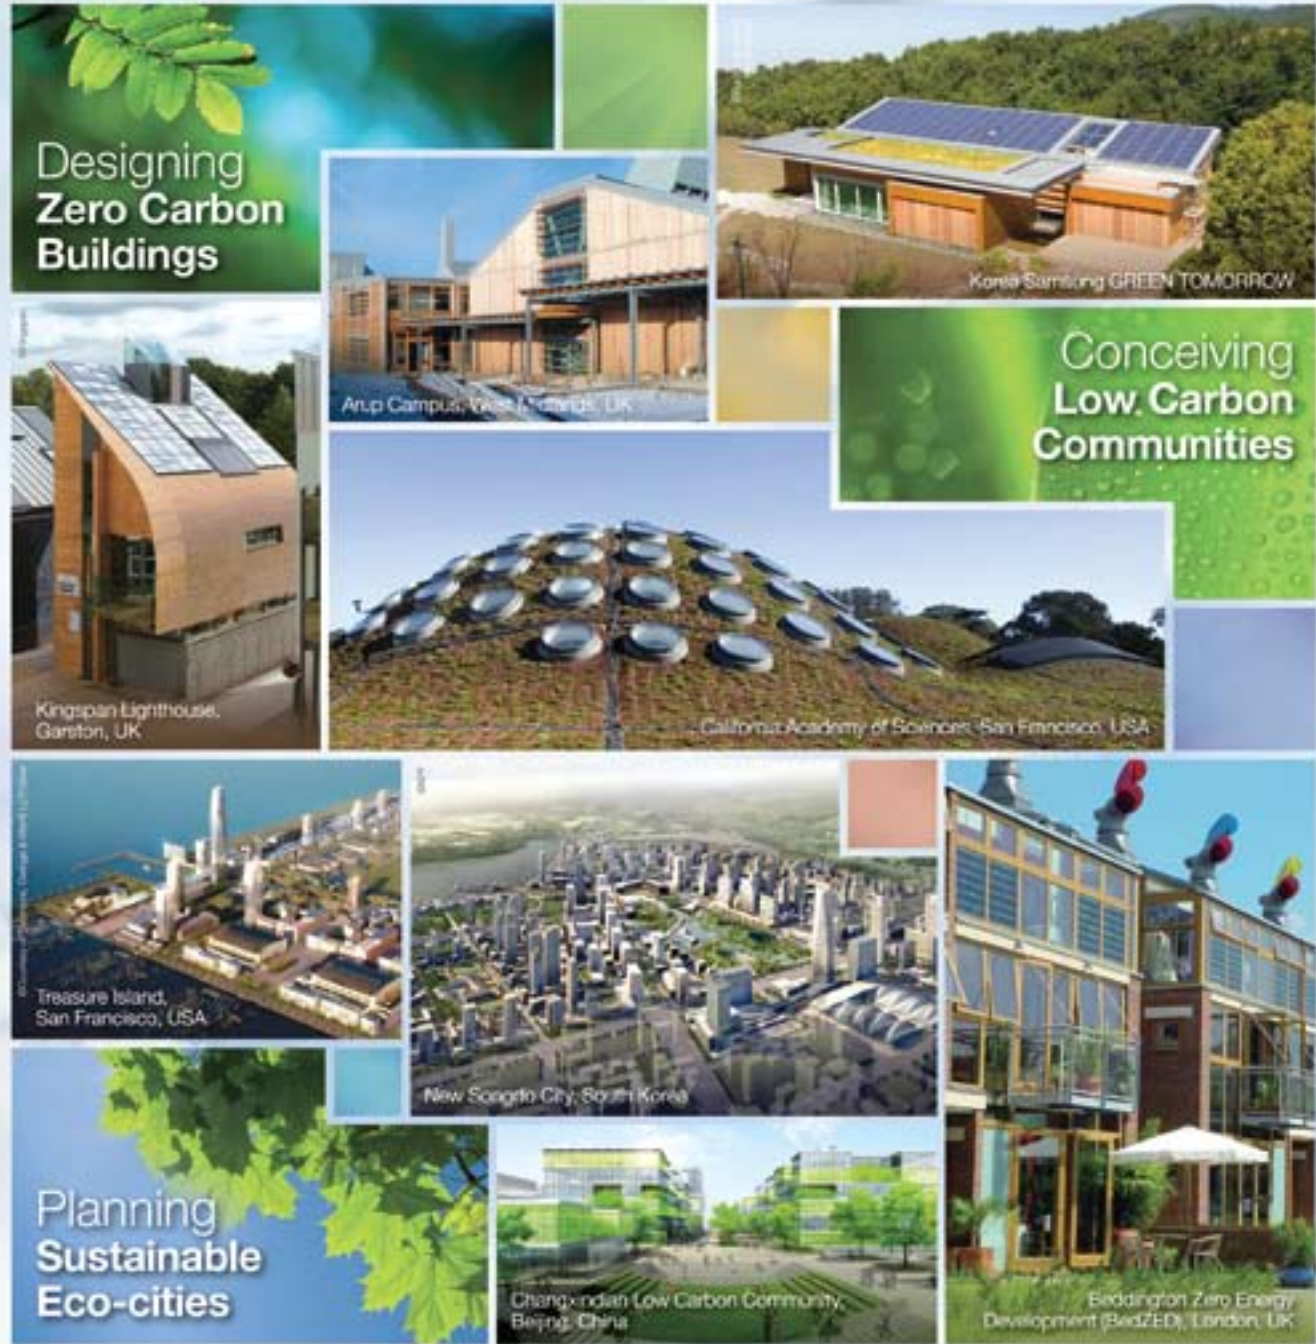

# Enriching communities

with sustainable solutions

A long-standing leader in the built environment, Arup pioneers a strong focus on providing sustainable solutions for harmonious communities that balance the social, cultural, economic and environmental dimensions of human existence.

黃澤恩顧問工程師事務所

- 上蓋結構及土木工程的整體設計服務
- 屋宇及斜坡檢驗維修

## Towngas Aims at a Greener Future

We conduct our business with environmental responsibility in mind - for a greener future, for our younger generations.

Towngas always strives to be Asia's leading clean energy supplier. Our environmental initiatives date back to as early as the 70s, when we began using naphtha rather than heavy oil and coal to produce town gas, greatly reducing the emission of sulphur dioxide and contributing to the prevention of acid rain. In 2006, we introduced natural gas as feedstock in addition to naphtha to further improve the environment. In recent years, we have succeeded in utilising landfill gas for gas production purpose – further lowering carbon dioxide emissions. Towngas has also ventured into the green auto business by providing liquefied petroleum gas that is a cleaner fuel for taxis and mini-buses – helping to improve the air quality for Hong Kong.

# EXCELLENCE, ALWAYS.

For more than a century, HK Electric has been the power behind Hong Kong, making Hong Kong one of the world's leading cities and financial centres.

Over the years, we have continuously improved our services, modernised our facilities and enhanced our reach as Hong Kong grows. Today, we are a global leader in terms of supply reliability, maintaining a world-class record of 99.999% and providing the energy that keeps the heart of Hong Kong beating.

Driving these efforts is our pursuit for excellence and our commitment to doing our best to serve various stakeholders in the community.

Truly, we're always on for Hong Kong.
